SUMMARY

Flutter Mobile App Developer with production experience building cross-platform iOS & Android apps using Flutter, Dart, Firebase, and RESTful APIs. Delivered LogicQ — a scalable ed-tech platform with Provider state management, 3-tier role system, real-time analytics, and CI/CD workflows. B.Tech IT seeking a Flutter developer role.

TECHNICAL SKILLS

Mobile: Flutter, Dart, Cross-Platform iOS & Android, Custom Widgets, Widget Tree Optimisation, Hot Reload

State & Architecture: Provider, MVC, MVVM, Clean Architecture, Role-Based Access Control

Backend & APIs: Firebase (Auth, Firestore, Realtime DB, FCM Push Notifications), Supabase, Flask

Dev Tools: Git, GitHub, Android Studio, VS Code

Other: React, HTML, CSS, JavaScript, Python, MySQL, SQLite, NumPy, Pandas, Matplotlib

EXPERIENCE

Flutter Mobile App Developer — Intern

Jan 2025 – Present **Innolift Ventures, Chennai**

Project: LogicQ — Cross-Platform Ed-Tech App | Stack: Flutter · Dart · Firebase · Provider · RESTful APIs

- Engineered a production-grade cross-platform Flutter app (iOS & Android) with Provider state management across 7+ course domains (Python, Java, CAD, Mobile Dev, Arduino, Embedded Systems, Business); built a 3-tier role system — Student, Mentor, Institution — each with dedicated dashboards, permissions, and real-time data exchange via RESTful APIs.
- Implemented Firebase Auth, Firestore, and FCM push notifications for secure login, zero-downtime real-time sync, and instant alerts; built a reusable custom widget library (course cards, progress indicators, analytics dashboards) reducing screen-build time and ensuring UI consistency across all views.
- Integrated an in-app test engine with automated grading and instant performance analytics; optimised widget tree via lazy loading to improve frame rate on low-end Android devices; shipped all features within agile sprints (daily stand-ups, sprint planning, code reviews).

PROJECTS

Expense Tracker — Flutter Mobile App

2026 **Personal Project**

Stack: Flutter · Dart · Firebase · Provider · FCM · RESTful APIs

- Built a production-ready cross-platform expense tracker with Provider state management; features per-user panels, category-based pie chart dashboards with custom widgets, time-stamped transaction logs, FCM push notifications triggered when monthly spend exceeds user-defined budget limits, and Firebase Firestore real-time sync ensuring zero data loss across sessions.

Student Mark Analysis System — Full Stack Web App

2026 **Personal Project**

Stack: React · Flask · SQLite · RESTful APIs · Git

- Architected a 3-panel role-based web system (Admin / Teacher / Student) using React frontend and Flask/SQLite backend; Admin manages users and academic data, Teacher handles attendance tracking, mark entry, behaviour recording, and assignment publishing, Student accesses results and downloadable PDF reports; implemented secure RESTful APIs with MVC architecture and Git feature-branch workflow with pull request reviews.

EDUCATION

B.Tech — Information Technology | CGPA: 8.4 / 10 2022 – 2026 **Adhiparasakthi Engineering College, Melmaruvathur**

HSC 85% | SSLC 89.2% P R G Higher Secondary School, Kattumannarkoil (2022 / 2020)

CERTIFICATIONS

- Basics of Python – Infosys Springboard
- Software Engineering – Infosys Springboard
- Data Analytics – Google (Nan Mudhalvan)
- Responsible AI – Simplilearn |
- Salesforce Developer – Nan Mudhalvan
